WILL IT PAY?

This is the question that naturally arises when one anticipates embarking in a new enterprise. No other form of entertainment has so large a field in which to work, and no other can be operated at so small an expense.

There are public schools, churches, fairs, lodges and an endless number of different societies where exhibitions can be given.

It is not necessary to prepare your own lecture or to be a public speaker. Printed Lectures on almost all subjects can be obtained, which are read as the slides are projected on the curtain.

For one with a limited capital the small towns offer a good field. These people have few opportunities to see an entertainment. They are easily pleased and patronize liberally anything in this line.

A Phonograph or Gramophone adds to the value of your show, and renders you independent of all outside sources of Music. A special catalogue of Phonographs and Gramophones will be sent on request.

There is no question but that stereopticon and moving picture exhibitions, when well managed and the proper means are employed to bring them before the public, are highly remunerative. The amount of money required to secure a first class outfit is far less than any other business which pays equally as well.

Terms.

There is a discount of 2 per cent when full amount of cash is sent with your orders. Otherwise, send 20 per cent of the amount of order in cash, and we will ship C. O. D. for balance. We do not sell goods on the installment plan.

Illustrating the use of this lens: Assuming that a moving picture machine has been placed at a distance of 50 feet from the curtain which is 12 feet in size. On making his first trial the operator focuses his objective and finds that his picture is too large for the curtain. He then reduces it to the exact size of his curtain merely by revolving the front ring of the objective, which controls the inner combination of lenses.

Changes in size of picture can be accomplished while the machine is in operation. **Adjustable Lens, price \$20.00.**
